Medical Recommendations

1. ■■ Potential stroke indicators detected
2. ■ Consult a neurologist immediately
3. ■ Call emergency services if experiencing symptoms
4. ■■ Check nearby hospitals for immediate care
5. ■ Download the medical report and bring to your doctor

Recommended Actions

• ■ Seek immediate medical attention

- ■ Call emergency services (108/112)

- ■ Visit nearest neurology hospital

- ■ Show this report to your doctor

- ■ Time is critical - act within 3-4.5 hours

AI Health Assistant Advice

Regular monitoring and lifestyle modifications recommended. Consult with a neurologist for detailed assessment.

Important Disclaimer

■■ MEDICAL DISCLAIMER:

This report is generated by an AI-powered system for informational and educational purposes only. It is NOT a substitute for professional medical diagnosis, advice, or treatment.

Please note:
• This AI analysis should be confirmed by qualified medical professionals
• Always consult a licensed neurologist or healthcare provider
• Do not delay seeking medical care based on this report
• Individual results may vary and require clinical interpretation
• This tool is designed to assist, not replace, medical expertise

In case of emergency:
If you are experiencing stroke symptoms (face drooping, arm weakness, speech difficulty), call emergency services immediately: India (108/112), US (911), UK (999).

About BrainHealth AI:
BrainHealth AI uses advanced deep learning algorithms to analyze brain imaging. The system continuously improves through machine learning but should always be verified by medical professionals with appropriate credentials and clinical context.
